

Methodology

The Civics Knowledge survey questions were part of the ongoing 2014 Annenberg Institutions of Democracy project for a period of seven days. A total of 1,416 adults were surveyed by telephone between July 8 and July 14, 2014. A total of 699 were completed with respondents on landline telephones and 717 by cell phone. Interviews were conducted in English and Spanish. Data were weighted to correct for known differences in the probability of selection of respondents, account for survey nonresponse, and increase the representativeness of the sample. The data were weighted to known population parameters based on the March 2013 Supplement of the U.S. Census Current Population Survey (CPS). In addition, the data were weighted to represent the distribution of the adult population by phone status (cell phone only, landline only or dual-user), based on the CDC's 2013 National Health Interview Survey (NHIS). Adjusting for the effect of weighting, the maximum margin of error for the full sample is +/-3.06 percent at the 95 percent confidence level. The survey was conducted by Abt/SRBI (www.srbi.com).
