

Annenberg Science Knowledge Survey: Zika
March 31-April 4, 2016 (Week 8)
Appendix

Who do scientists think will be most likely to have severe health effects if they get the Zika virus? (READ LIST)

	4/4/16 %
Pregnant women	26
Adults with existing health conditions that affect the immune system like HIV	12
Infants born to women who had the Zika virus during pregnancy	32
Men who have the Zika virus but do not show symptoms	2
Everyone	18
Don't know	9
Refused	*

*Less than 0.5%

Just your best guess. How do scientists think someone can get the ZIKA virus? (INSERT ITEM).

Is it very likely this is a way someone can get it, somewhat likely, not too likely or not likely at all that this is a way someone can get the ZIKA virus?

*By being bitten by a mosquito that has already bitten someone who has the ZIKA virus***

	LIKELY %			NOT LIKELY %			Don't know %	Refused %
	NET	Very likely	Somewhat likely	NET	Not too likely	Not likely at all		
4/4/16	79	48	31	15***	9	5	7	*

*Less than 0.5%

**Total does not add to 100% due to rounding

***NET does not add up because of rounding

*By having sexual intercourse with a man who has the ZIKA virus***

	LIKELY %			NOT LIKELY %			Don't know %	Refused %
	NET	Very likely	Somewhat likely	NET	Not too likely	Not likely at all		
4/4/16	60***	29	30	24	11	13	16	1

**Total does not add to 100% due to rounding

***NET does not add up because of rounding

How accurate, **if at all**, is it to say that a pregnant woman who is infected with the ZIKA virus is more likely to have a baby with an unusually small head and brain? (READ LIST)

	ACCURATE %			NOT ACCURATE %			Don't know %	Refused %
	NET	Very accurate	Somewhat accurate	NET	Not too accurate	Not at all accurate		
4/4/16	74***	39	36	13	7	6	13	*

*Less than 0.5%

***NET does not add up because of rounding

ANNENBERG SCIENCE KNOWLEDGE SURVEY METHODOLOGY: WEEK 8

The study was conducted for the Annenberg Public Policy Center via telephone by SSRS, an independent research company. Interviews were conducted from **March 31-April 4, 2016** among a sample of **1,017** U.S. adults. Total Cell phone respondents were 610 and there were 37 respondents who completed the survey in Spanish. Data were weighted to represent the target U.S. adult population. The margin of error for total respondents is +/- 3.7 % at the 95% confidence level.
