

Annenberg Public Policy Center of the University of Pennsylvania  
ASAPH W26 Vaccine Perceived Safety Items

February 9, 2026

## 1 Overview

These studies were conducted for the Annenberg Public Policy Center of the University of Pennsylvania via web and telephone by SSRS, an independent research company. Interviews were conducted among a nationally representative probability sample drawn from SSRS's Opinion panel. Data were weighted to represent the target U.S. adult population. Summaries of the sample size, field dates, and estimated design effects (Deff) of the particular waves can be found in the table below.

ASAPH panelists are quarantined from other survey panel membership to avoid being affected by the content of other surveys. Data used in Wave 11, however, contains 19 respondents who self-reported membership in other opinion panels. Diagnostics revealed no significant differences in the responses of these 19 panelists and the results presented in this report are unaffected by their exclusion.

Wave	n	MOE	Deff	Fielded	Closed	Survey	RR	N
a-1	1941	2.9	1.76	2021-03-30	2021-04-19	ASAPH 1	56%	3480

## 2 Topline

The remaining portion of this document provides the topline results reported in the release. All figures are rounded to the nearest whole number and may not add to 100%. Combined subcategories may not add to totals in topline and text due to rounding. A lowercase e stands in for values that round to 0, but are not exactly 0. Aggregated NET categories are highlighted in grey. Superscript letters indicate statistically significant differences with the corresponding wave.

### SAFEVAX2.

As far as you know, for each of the following vaccines, please indicate how safe, if at all, you think getting it is. – The measles, mumps, and rubella (MMR) vaccine

Wave	N	NET Unsafe	Very unsafe	Somewhat unsafe	NET Safe	Somewhat safe	Very safe	Not sure	Refused
(z) 12/01/25	1637	8	4	4	83 <sup>i</sup>	22	61	8	0
(v) 11/24/24	1771	8	2	6	86 <sup>p</sup>	25	61	6 <sup>p</sup>	0
